

HOLLYWOOD Nails

After Care of your Nail enhancements

- When lifting anything, use the pads of your fingers, not the tips of your nails, take extra care when opening doors and pulling handles.
- Always use cuticle oil to keep cuticles unattached and well nourished.
- Always wear protective gloves when gardening or doing DIY jobs.
- Nails should be individually dried as and when they get wet.
- Some suntan lotions can dissolve your nail polish and discolour your nail enhancement.
- Acetone Free, Nail varnish remover for all nail enhancements.

Maintenance programme

Your natural nail will continue to grow with your new enhancement and a small gap will appear between the cuticle and your new enhancement which will need filling. The cost and frequency can vary and are best discussed with a technician, or reception staff who will be able to help, an infill is usually required every 2/3 weeks.

never immerse your nail enhancements in any solution you would not put on your face
